

MIA

The first **modern pellet stove**, stackable and customizable. .

MIA IS UNIQUE, NOT ONLY IN ITS DESIGN but also in its technology and high-quality materials.

MADE IN ITALY

MIA, a warranty of quality and experience.

HIGH EFFICIENCY

Excellent performances: average productivity higher than 91% on the whole range.

TOTAL CUSTOMIZATION

MIA's combustion chamber is embedded in a structure which, thanks to the standardized dimensions, allows complete modularity with the whole range of available accessories. The front covers system allows MIA to suit any architectural style.

Mia Stile is characterized by its contemporary design, with versatile and elegant shapes that suit any environment perfectly, from the most modern to the most classical.

Mia Vertical is characterized by a simple aesthetic, with sharp lines and compact shapes, in a real Industrial style, for more urban tastes and minimal environments.

Mia Stile

Mia Vertical

A WORLD OF ACCESSORIES

Thanks to the range of available accessories, every Mia stove is a unique piece, custom-tailored for the most diverse needs. All the accessories are compatible with all sizes and can be placed on both sides of the stove.

There are two basic modules, with the following dimensions: 40x40 or 80x40 cm, and they both can be combined with the shelves and doors.

HIGH QUALITY OF MATERIALS

The fireplace and the brazier are made of thick inox steel, which ensures durability in time and makes maintenance extremely easy.

The user-friendly display is completely integrated in the design thanks to the hidden closure mechanism.

To complete the structure, there are a real leather lace with a laser-manufactured button that simplifies the opening of the structure's door, and interior design legs in a contemporary style.

DESIGN OF EXCELLENCE

Simplicity and lightness are the main feature of Mia, its modern design has been awarded in some of the most famous international Design contests.

reddot design award 2015

MIA has been awarded the REDDOT DESIGN 2015 price, for the perfect integration between technology and design.

Mia has been awarded the GOOD DESIGN 2015 price, released by the prestigious Chicago University.

CLEAN AIR CERTIFICATION™

Simplicity and lightness are the main features of Mia, whose modern design has received awards from some of the most famous international Design contests.

AriaPulita™ is a product certification system established and promoted by AIEL that certifies the suitability of woody biomass heating systems to ensure specific performances, expressed in terms of performance (efficiency) and emissions (dust, nitrogen oxide, carbon monoxide, organic compounds).

MIA 2 7,5

MIA, a stove with endless options.

MIA2 7,5 (STOVE UNIT ONLY) Code 99469

FEATURES

Firebox thermal power (min - max): 3,4-7,3 KW
Power (min - max): 3,11-6,8 KW
Average Efficiency: 91,6%
Heating volume: 80m² - 229m³
Operating autonomy: 13,9 h*
Capacious tank: 15kg of pellet capacity, equal to 1 bag of pellets to guarantee a long operating time
Programmable electronic control system
Integrated display, adjustable and user-friendly
Double door with magnetic closure
Internal door seal in "Glass fiber"
Multifunction remote control

Covers available in the colors:

PLUS

Display with daily and weekly programming.

Combustion chamber system with front access.

Extremely compact dimensions, only 52 cm of depth.

Extremely reduced consumption.

TOTAL FLAT front aesthetic
